Flujos de datos Gen1

Dataflows: Thank you for eight years of Gen1—and why Gen2 is the future

Miguel Llopis
Group Program Manager - Data Integration

2 abril, 2026

Share Tweet Like

For more than eight years, customers have relied on **Power BI Dataflows (Gen1)** as a core part of their analytics solutions. We're grateful for the trust you placed in the Power Query experience to build reusable, low-code data preparation pipelines that power reports, semantic models, and downstream analytics.

Now, we're sharing an update on the future of Dataflows.

Dataflows Gen2 builds on everything you know from Gen1—preserving the familiar Power Query authoring experience—while delivering major improvements in scale, flexibility, cost efficiency, and manageability. Going forward, **all new Dataflow innovation will land only in Dataflows Gen2**.
