Fabric August 2026 Feature Summary

Katie Murray **ADMIN** Administrator 👁 10,988

20 days ago

Welcome to the August 2026 Fabric update!

Microsoft Fabric continues to evolve with new capabilities that help organizations build, manage, and scale their data and AI solutions more efficiently. This month's updates introduce enhancements across Fabric Platform, OneLake, Data Engineering, Conversational Analytics, Data Warehouse, Real-Time Intelligence, and Data Factory.

Whether you're strengthening governance, improving performance, streamlining development workflows, or expanding AI-powered experiences, these updates are designed to help you get more value from your data while simplifying day-to-day operations. Explore the following highlights to see what's new in Microsoft Fabric this month.

https://community.fabric.microsoft.com/blog/fbc_fabricupdatesblogs/fabric-august-2026-feature-summary/5325824

Fabric July 2026 Feature Summary

Katie Murray **ADMIN** Administrator 👁 14,129
1 month ago

Welcome to the July 2026 Fabric update!

This month brings new capabilities across the Fabric experience, from improved deployment and governance experiences to expanded Spark, Eventstream, and Real-Time Intelligence functionality.

Whether you're building data pipelines, managing analytics workloads, or monitoring real-time operations, these updates help you work more efficiently and get more value from your data.

Fabric Runtime 2.0 (Generally Available)

ArshadAliTMMBA **MICROSOFT** Microsoft Employee · 2,900

1 month ago

Fabric Runtime 2.0 (Generally Available), marks a major milestone for Microsoft Fabric. As the execution foundation for Microsoft Fabric's Data Engineering and Data Science experiences, Runtime 2.0 delivers a modern, high-performance platform built on Apache Spark and deeply integrated across the Fabric ecosystem.

This release includes significant platform upgrades, including **Apache Spark 4.1, Delta Lake 4.2, Python 3.13, Java 21, Scala 2.13, and Azure Linux 3.0**, providing a modern and enterprise-ready foundation for the next generation of data engineering, data science, and analytics workloads.

Runtime 2.0 also unlocks access to the latest capabilities and APIs from Spark 4.1 and Delta Lake 4.2, allowing customers to immediately benefit from new functionality while ensuring a smooth transition to newer platform components such as Python 3.13, Java 21, and Scala 2.13.

We Put a GPU Behind Fabric DW

Bogdan Crivat **MICROSOFT** Microsoft Employee 👁 3,554

2 months ago

At Microsoft Build, Fabric Data Warehouse announced GPU-accelerated query execution. I've been running it against TPC-H, and the numbers are worth sharing, along with the methodology, because I'd rather hand you enough detail to check my work, and let you do it yourself.

This has been one of the most complex and deeply technical projects I've been involved in at Microsoft, reminding me of the days of developing Vertipaq more than 16 years ago. And it's also been one of the most rewarding projects.
