Fabric Apps (Demo)

A · D · N Fabric

Fabric on-demand billing and zero provisioned

Public preview

Pay only for what you use with automatic compute scaling and no idle infrastructure costs.

Choose the approach that fits your needs:

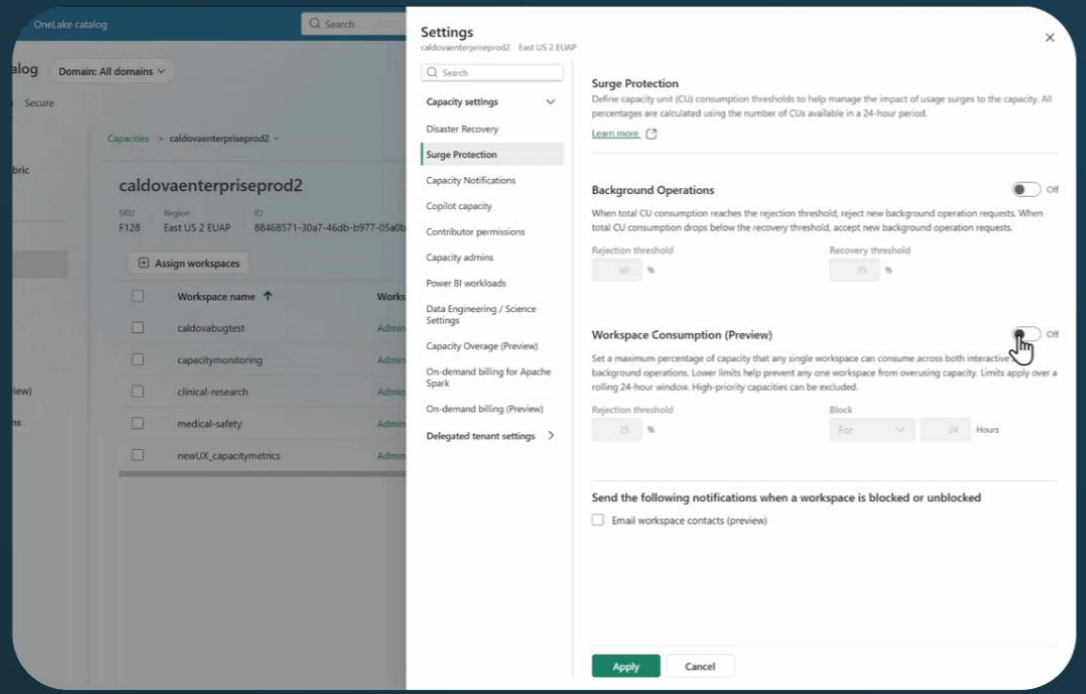

1. **Use a Fabric zero provisioned (F0) SKU** to pay nothing upfront and run every workload with on-demand billing.
2. **Adopt a hybrid model by enabling on-demand billing** for select workloads while keeping others on provisioned capacity.

Stay in control with spend limits, usage monitoring, and built-in governance

A·D·N Fabric

Workspace-level surge protection

Now Generally available

Apply capacity limit for workspaces to prioritize & balance capacity demand

Block noisy neighbors from using all available capacity

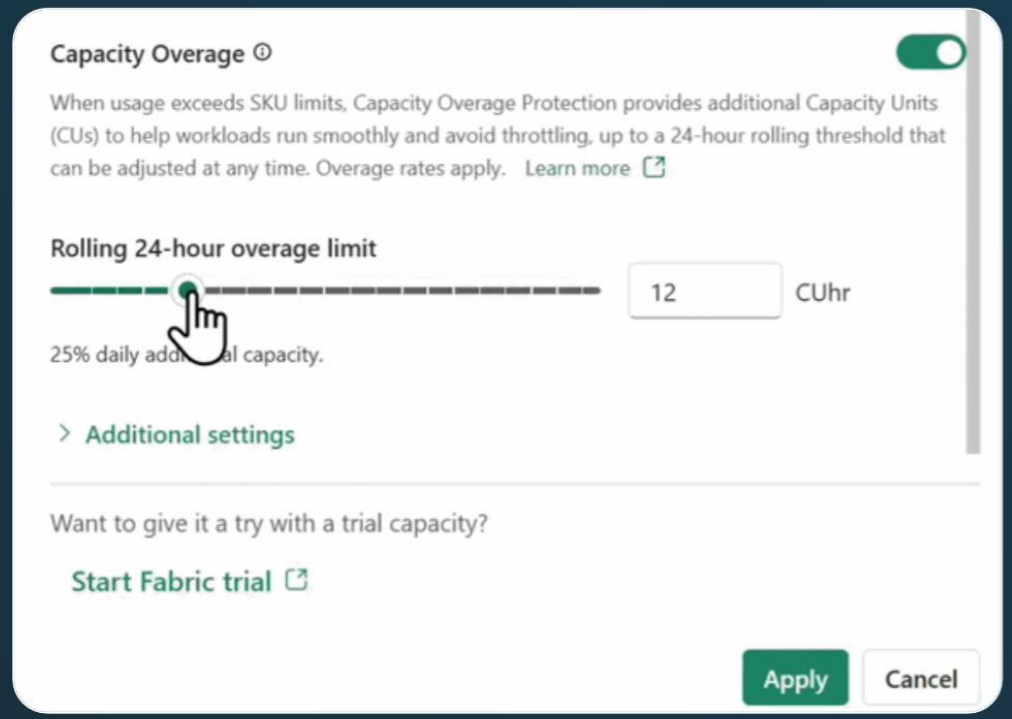

Use Mission Critical mode to keep essential workloads exempt from the limit

Manage directly in OneLake catalog or in-the-moment within Monitor Hub

A · D · N Fabric

Capacity overage billing

Now Generally available

Automatically prevent throttling by paying for extra usage when capacity limits are exceeded

Set spending limits during capacity creation or in OneLake Catalog

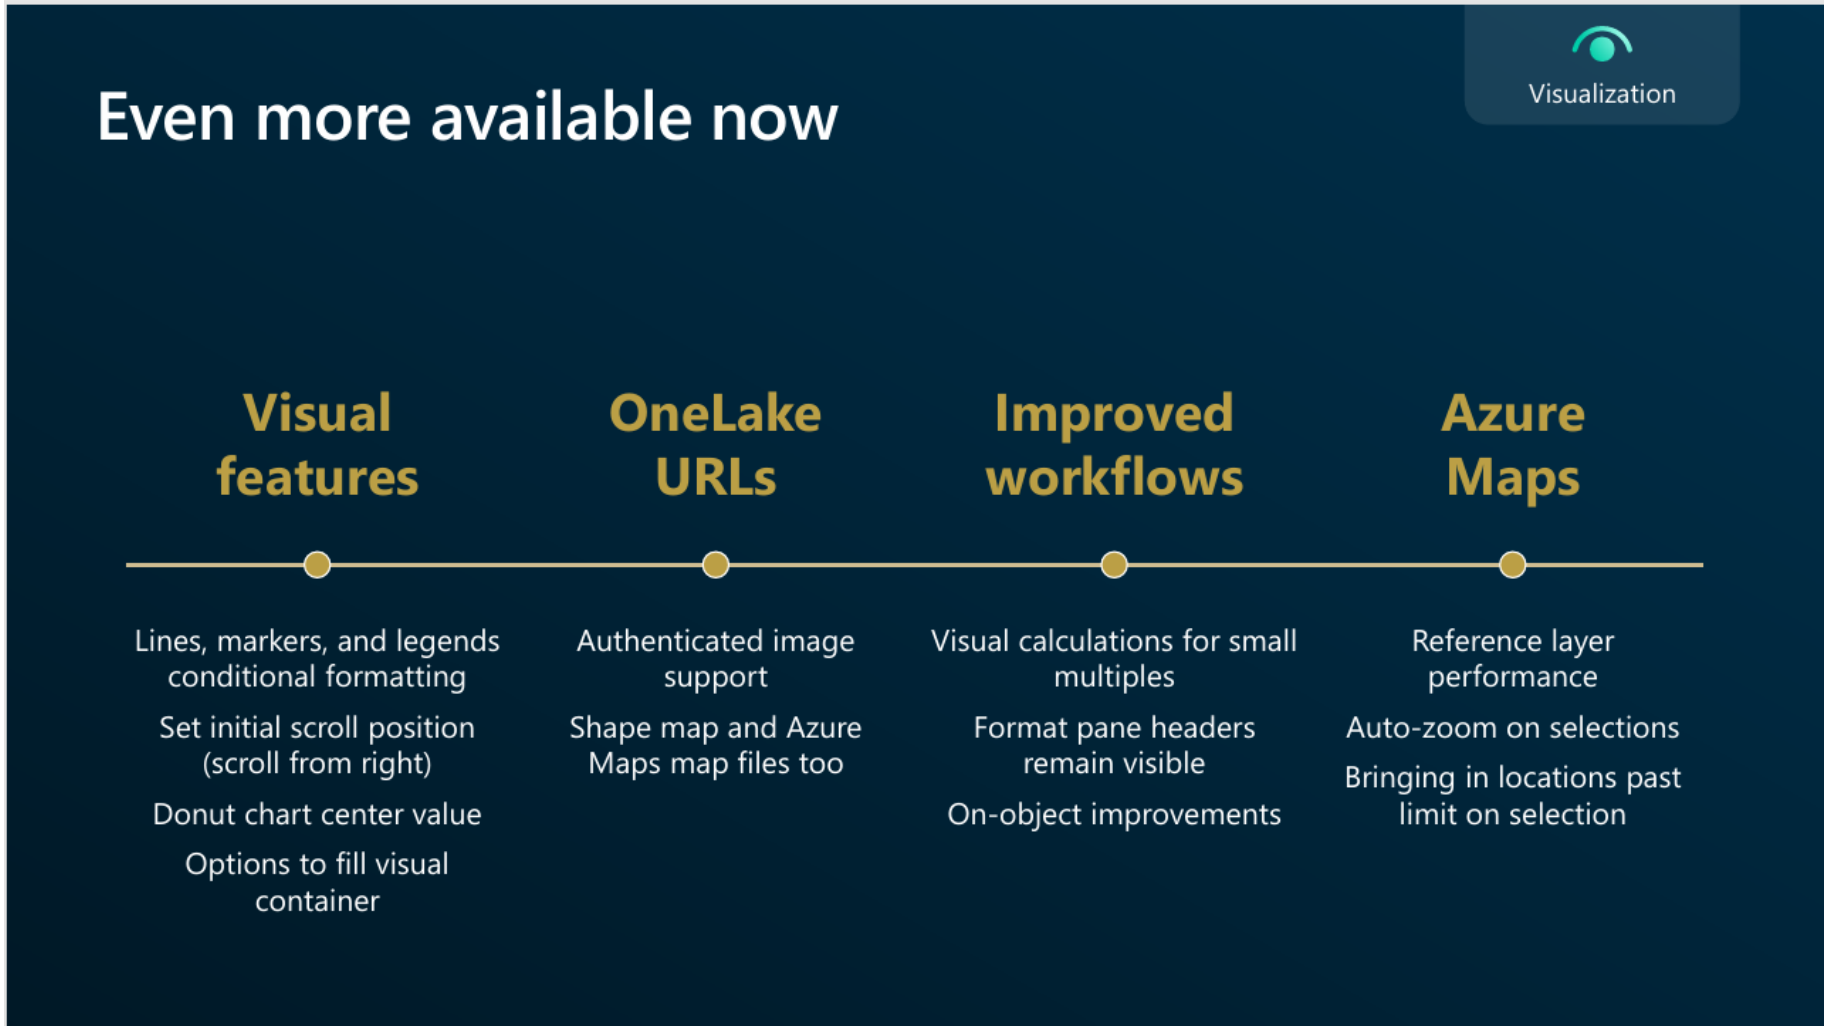

Get notified automatically when capacity overage limits are invoked

New

Larger Fabric SKUs generally available: F4096, F8192
